## **Student Services School-Linked Team Visits**

Dear Parents/Guardians:

In addition to the support in place for students at the school level (the school-based team), Black Gold School Division has access to a variety of additional specialized services to support learning opportunities for students (school-linked team).

Members of the School-Linked team are in our schools throughout the year. The team includes:

- Speech-Language Pathologist
- Occupational Therapist
- Physical Therapist
- Success Coach / Family School Liaison
- Audiology
- Other developmental, social, emotional and behavioral services accessed by the school to support learner needs.

These team members will be visiting the classrooms throughout the school year and will provide general suggestions and strategies to support the teaching staff and students in areas such as motor skills, communication skills, play skills, and everyday classroom participation. Through observation and discussion, the school-based team may determine that your child could benefit from more specific strategies from any of the above listed team members. If that is the case, you will be contacted and have an opportunity to discuss this further.

Sincerely,

Black Gold School Division Student Services
